**RE: 34293 – Redondo Culvert Replacement
PROJECT & SURVEY NOTIFICATION**

Dear Property Owner/ Resident:

The City of Federal Way is beginning the design of the Redondo Creek Culvert Replacement project. This project is located along a utility access road off of Redondo Way S (just north of S Dash Point Road), shown as a star symbol on the attached vicinity map. The current culvert does not have enough capacity to handle high levels of water flow. The project will replace the failed culvert with one that is fish-passable.

This project is scheduled to be constructed during the summer of 2023.

The design of this project is funded by City of Federal Way Surface Water Management funds. The construction of this project is currently unfunded, but the City is planning to include additional Surface Water Management funds for the construction costs in the 2023 City Budget.

GeoEngineers is a consulting engineering firm that has been retained by the City to complete the engineering design for this project. One of their first steps of the design is to survey the existing conditions within the project limits. Over the next several weeks you may see surveyors along the utility road or the adjacent portion of your property completing the survey. Your cooperation with the survey crews will be appreciated.

If you are the owner or manager of a property leased to others (for example, a business complex or apartments), please share the news of this upcoming project with your lessees.

Thank you in advance for your cooperation.

Sincerely,

Christine Mullen, P.E.
Senior Capital Engineer
